## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the bending lines" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the basis" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the obtained folded structure" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the shape" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the curvature" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the given curvilinear folded structure design parameters" in lines 6 and 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the design parameters given" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3721

In claim 1, line 4; "to joining of the obtained folded structure plane block" is vague and/or indefinite as it is not clear what applicants are referring to by "joining of the obtained folded structure"? etc.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 the best understood is rejected under 35 U.S.C. 102(b) as being anticipated by Czaplicki (U.S. Patent No. 5,028,474).

Czaplicki discloses the claimed method for curvilinear folded structure as the best understood of the claimed language, see for example Figs. 1-8.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 the best understood is rejected under 35 U.S.C. 103(a) as being unpatentable over Czaplicki (U.S. Patent No. 5,028,474).

Czaplicki does not disclose the exact thermal treatment under reheat temperature to 180-210 C and decay time to 20-30 minutes. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Czaplicki's method

Art Unit: 3721

by having the exact thermal treatment under reheat temperature to 180-210 C and decay time to 20-30 minutes, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
